APA is National Champion in Math, Again!

APA Awarded National Championship in National Mathematics Competition

Assalamu Alaikum wa Rahmatullahi wa barakatuhu

APA students have made us proud once again! Students in Grade 6-7 have achieved extraordinary results in the 2009 Continental Math League (CML) competition. Students participating in this nationwide contest had to take five different sets of Math tests and one achieves a “Perfect Score” only if he or she scores 100 % in each one of these five different tests.

We are pleased to share with you that based upon the perfect scores of our 6th and 7th graders CML has awarded APA:

The National Champion in National Mathematics Competition

We congratulate our students for their achievements and bringing fame to our school in this prestigious nationwide Math competition. Thanks to our parents for their support and encouragement they offer to their children. Indeed parental involvement is a key factor in the performance of any student. Our teachers, particularly Mr. Syed Fareed Ejaz, deserve our special appreciation for the guidance and training they provided to our students throughout the year.
